

Federal Contract Opportunities Update

Notices for May 27-June 1, 2025

This update contains summaries of procurement notices issued between May 27-June 1, 2025 that pertain to hazardous waste, investigation and cleanup of environmental contamination, and related environmental topics. However, it does not necessarily contain EVERY notice on these topics.

If you would like to search for additional current and archived notices, or receive notification of solicitation amendments, please visit the [FedBizOpps web site](https://www.fedbizopps.gov).

F -- UMIAT RELEASE INVESTIGATION (SRCSGT)

SOL: 697DCK-25-R-00353

DUE: June 9, 2025

NAICS: 562910. THIS IS A SOURCES SOUGHT NOTICE FOR MARKETING PURPOSES ONLY. The Federal Aviation Administration seeks to solicit statements of interest and capabilities from Small Business Administration (SBA) SEDB 8(a) certified business concerns capable of performing a remedial action and remedial investigation at the former Umiat Radio Range in Alaska. Generally, the scope will be to delineate the metal- and petroleum-contaminated soil, sediment, and surface water associated with historical FAA activities at two ponds and a former drum site. Work will include the collection of surface water and sediment samples from eight nearby tundra ponds to establish background conditions; analysis of surface water and sediment samples for RCRA Metals (dissolved and total), GRO, RRO, DRO, PAHs, and VOCs by a laboratory that has been approved or certified by the State of Alaska; the calculation of TAH and TAqH concentrations for all surface water samples; and performance of a horizontal and vertical survey of all surface water and soil sample locations, and any other locations deemed to be pertinent to the project. Following the completion of field activities, the sites must be restored to preexisting conditions. No materials or equipment be left at the facility. The field work must occur in the Spring/Summer of 2026. The Umiat Radio Range is not connected to the state's road system and is accessible either by land or helicopter. There is no remaining FAA infrastructure and therefore there are no FAA-imposed access restrictions on the former facility. The project site is, however, located on property owned by the Alaska Department of Transportation and Public Facilities; a Right-of-Entry permit must be obtained by the Contractor. The Contractor must provide transportation for one FAA representative to Umiat whenever the site is accessed by the Contractor or their subcontractor(s). Due to the absence of commercial lodging options, lodging and meals must be provided to the FAA representative by the Contractor throughout the project's duration and be equivalent to the accommodation provided to the Site Superintendent or Field Team Lead. The full statement of work will be issued at Solicitation phase. RESPONSES ARE DUE BY 2:00 PM CDT ON JUNE 9, 2025.

F -- SOLICITATION NOTICE: ASBESTOS, MOLD AND LEAD ABATEMENT BPA AT ELLSWORTH AFB, SD (SOL)

SOL: FA469025Q0023

DUE: June 9, 2025

NAICS: 562910. THIS IS A TOTAL SMALL BUSINESS SET-ASIDE. The U.S. Department of the Air Force, Air Force Global Strike Command, requires a contractor to perform the inspection, sampling, removal, and disposal of friable and non-friable asbestos-containing materials (ACM) from facilities on or controlled at Ellsworth Air Force Base (EAFB), South Dakota. Work also includes applying insulation around pipes and fittings after asbestos removal, removing lead and lead-containing materials primarily from the Combat Arms Training and Maintenance

(CATM) range, but also from other facilities on or controlled at Ellsworth Air Force Base (EAFB), removing and de-contaminating mold-contaminated building materials, and disposing of mold-contaminated material at an EPA- and State-Certified landfill. At the completion of any mold project, all landfill receipts shall be given to the Ellsworth AFB Toxic Program Manager for review and filing. This shall be accomplished as requested by the Contracting Officer or an authorized representative of the Contracting Office. Work may include, but is not limited to the demolition, removal, repair, enclosure, encapsulation, and disposal of pipe insulation, vessel insulation, spray-applied insulation, ceiling tile, floor tile, transite wall board/piping/siding, contaminated soil, fireproofing, and pipe fitting insulation at EAFB. The contractor will be responsible for obtaining all required permits. OFFERS ARE DUE BY 12:00 PM MDT ON JUNE 9, 2025.

F -- LEAD ABATEMENT RESIDENT QUARTERS L (COMBINE)

SOL: 6923G225Q000007

DUE: June 13, 2025

NAICS: 541620. THIS IS A TOTAL SMALL BUSINESS SET-ASIDE. The U.S. Department of Transportation, Maritime Administration, requires a contractor to provide a New York and/or Environmental Protection Agency (EPA) qualified and licensed lead abatement specialist to provide all management, tools, supplies, notification(s), equipment and labor necessary to perform lead abatement at resident Quarters L of the United States Merchant Marine Academy in Kings Point, New York. Given the sensitive nature of the occupied-resident areas, USMMA is requiring all work to be done in a negative pressure enclosure to minimize impact to building occupants and operations. All work must be completed using HEPA vacuum with a minimum filter requirement capable of capturing particulates of 0.3 microns with 99.97% efficiency and in conjunction with all federal, state and local laws and regulations. The award will be a firm-fixed-price contract with a period of performance of five days after the contract award. OFFERS ARE DUE BY 9:00 AM EDT ON JUNE 13, 2025.

Z -- ASBESTOS ABATEMENT @ INDU (SOL)

SOL: 140P6425Q0056

DUE: July 29, 2025

NAICS: 562910. THIS IS A TOTAL SMALL BUSINESS SET-ASIDE. The National Park Service seeks a contractor to perform asbestos abatement at US 12 Dorm in Indiana Dunes National Park (INDU) in Chesterton, Indiana. The contractor will perform asbestos abatement of approximately 830 square feet of 9" x 9" tiles (in brown and green) along with their corresponding black mastic. The contractor is required to remove any carpet or previous tile layers that were installed over the old 9" x 9" tiles and mastic containing asbestos. The contractor must adhere to all OSHA and IDEM regulations and notifications to ensure the safe removal of asbestos materials and properly prepare the site in accordance with federal and local safety standards. All bidders are urged to attend the site visit at 10:00 AM CDT on June 11, 2025, to examine existing conditions before submitting bids. The award will be a firm-fixed-price contract with a 60-day performance period to begin after issuance of the Notice to Proceed. OFFERS ARE DUE BY 12:00 PM EDT ON JULY 29, 2025.
